The Elden Ring is a action RPG that launched for the PS4 in Japan in 2018 and you can read our review of it. The Elder Scrolls Online is also still alive and kicking. Here are why you should buy the game, if you haven't already. Game of Thrones Season 8 - A fan theory has come forward that explains how Game of Thrones Season 8 will wrap. According to a fan theory, Game of Thrones Season 8 will not end with the final episode the showrunners have confirmed as we know it. Instead, the showrunners will wrap up the show by killing off some of the key characters in the Season 8 finale. The theory is based on the season 8 finale, "The Dragon and the Wolf" which was written by George R.R. Martin. In it, Tyrion Lannister is going to be the center of attention at the end of the episode. He is in a prison cell but he has some explosive comebacks to King's Landing life. Tyrion offers Cersei a deal - either she, Jaime, and Tyrion can leave King's Landing alive or everyone dies. Cersei chooses to leave with Tyrion and Jaime, who are already under arrest. At the end of the episode, Tyrion loses his dignity and is begging for the opportunity to take revenge on Cersei. At this point, Game of Thrones Season 8 will end as Cersei and Jamie are both dead and Arya is remaining in Winterfell. Fans also think that Daenerys Targaryen will be alive to finish her journey and rule over Westeros. (All these theories come from the comments section of the article). It can also be noted that with Game of Thrones Season 7, there were three major dragon deaths. As the show went on, many other dragons died. A total of eight main dragon characters have died, and this trend will continue if the theory is to be believed. bff6bb2d33

More by th3_d0g: 1. Mountaineering: The Monkey King In the vast expanse of the Mountains and Clouds, there is a certain monkey that

has lived since antiquity on the highest peaks. He has his own unusual society, where he is regarded as a divine being. The flute player, a wandering minstrel, has long marveled at this monkey. Having sought him out, he now informs him of an object near the top of a high mountain. The Monkey King accepts his challenge to obtain this object, and sets out alone with his loyal companions on a journey that takes them through three lands. Not only was the Monkey King of its own land, but it was also an icon of an ancient legend. This was the most important thing it wanted to retain in the sequel. It introduced the "ranking" system, allowing a set of characters to be ranked as the order, either physically or by virtue. The actions were very flexible, allowing you to customize the relationship between you and your opponent. You can freely move with your character in the vast landscapes of the land, and in turn, be chased into a dungeon by the monsters. You can easily perform more action by using larger-scale weapons and magic. An excellent instrument has been introduced as a large-scale weapon. It is called the "big flute", which can destroy all of the monsters that you have previously been chased by. In addition, the various endearing characters are also introduced, all of which have their own stories that will be told throughout the game.

2. Immersive 3D World Viewing in Online Multiplayer Not only can you transfer to other players in real time, but you can also directly talk to them and communicate with them in real time. Sharing the experience of different characters can be carried out while battling simultaneously. You can establish and develop your own relationship with your opponent and thus create a more dynamic battle. If you meet an enemy, you will be able to escape by holding the escape key, and if you meet an ally, the player will support you by using the "Buddy Aim". There are various mini-games where you can carry out various actions with them.

3. The Duel Battle In addition to the main character, you can select a "duel partner" that is a character with an unique custom appearance and selectable
